## Personal Statement

I love "hands on" work with data, I want improve (have more daily experience) with SQL and I want to start use Tableau. In my previous job I worked quite often with Excel, Power View and cubes so I know very well Pivot tables and had some experience with SQL. Mine main responsibilities was: - explain current reports details (Excel and online portal) and metrics meaning to clients, CSMs or data analyst; - help with new reports/metrics creation; - help operations to create and monitor internal dashboards; - troubleshooting - missing data, syncs, fluctuations and etc. - help for PO/DM to maintain backlog. So let's meet and talk about me experience and your expectations in more details! ;)

## Skill Stack

| METHODS | DATA BASE |
|---------|-----------|
| Scrum 3-4 years | MSSQL 1-2 years |
| Agile 3-4 years | SQL 1-2 years |
| Sprint 3-4 years | |
