

# Analyst

Mid-level (2-4 years experience)

**Working (Hit me with offer)** | Vilnius,  
Lithuania

## Sector Background

Bank&Finance

## Preferences

### Location

Vilnius only

### Current status

Working (Hit me with offer) (Updated: 1 day ago)

## Personal Statement

I studied Financial and Actuarial Mathematics, a program which includes many IT subjects. It was always appealing for me, because I see programming like solving a puzzle - it is challenging, requires attention to detail, thinking about all possible solutions and preventing mistakes. After finishing university I was working in finance: audit (2 years) and banking (1 year in risk analysis). After these experiences I realised I would prefer working as an analyst in IT, because I like working with data and the part of my job which requires IT skills is the most enjoyable for me. I have experience with SQL (Oracle), MS Excel (including VBA programming), MS Access and would appreciate the chance to learn more. I am motivated and can prove that I am willing to learn and be a valuable team member.

## Skill Stack

### DATA BASE

SQL 1-2 years

### LANGUAGE SKILLS
