## Apie Mane

I am a tech enthusiast looking for my next challenging undertaking. I have experience across a wide range of technology platforms, with varying levels of experience that includes software development, scripting, networking, infrastructure management, security, and operations. My current interests are in cloud services platforms (specifically AWS), automation, and the broader "DevOps" movement. Please get in touch if you are interested in discussing how my experience and skill set might help contribute to your project/organization!
