Personal Statement

My name is Vilius and I am 27 years old. I have Bachelor's degree in informatics and I have always been close with IT as it is very interesting to me. I am currently working in DevOps Team and my responsibilities are keeping QA\DEV Infrastructure running and creating improvements for maintenance or making QA team life easier. Some jobs/scripts are written and stored in Jenkins others are in my notes as I constantly trying to automate all my recurrent tasks. In current role I am working in different areas such as Networking, Storage and Physical servers - everything what makes infrastructure to be alive and resources are used efficiently. Mostly I am writing Powershell and bash scripts for deploying vCenters, Linux, Windows VM's, setting up VMware vCenters and configuring them accordingly to given requirements.

Working as an Application Delivery Engineer in Call Credit Group company I was working with different projects and I had to assist in delivering the product with DevOps tasks. Before I was working as Platform Build Engineer in Barclays IT center in Lithuania, Vilnius. Infrastructure and servers have always been my passion, I like to develop and maintain IT infrastructure, troubleshoot and learn more about technologies and usage in our environment. I am eager to learn more and I think I am on a good road now(I mean my each next step is going deeper in IT infrastructure architecture and servers, I am constantly expanding my knowledge tree). I have small amount of experience running queries on Teradata, working with MySQL in University. Oracle and

SQL Database installation on servers, pre-configuration before Primary DBA. Setting up TSM (Tivoli Storage Manager) on servers, configuring routes depending on server location. Powershell and Bash scripts to automate some daily tasks and deployments. Working with CISCO switches, troubleshooting in networking layer (server or switch side).

My English verbal and written skills are good, I have basics in Italian language as well.

Skill Stack

UNIX	DAUGIAU
Red Hat 3-4 years	Microsoft Windows Server 2008 2-3 years
Linux 3-4 years	
Scripting 3-4 years	
Linux/Unix Admin 3-4 years
