Personal Statement

I am purposeful, serious, person with big ambition. I easily can find a common language with people. My positive attitude to life helps me in achieving my goals and in the relations in collective, with people around me.

My main purpose of life is to self-actualize like professional.

I got used to go forward and up, to have success in everything i am doing, to achieve the goals what I have set.

I will be glad to join your team and to work hard,to do my best for a company goodness and success, also for my own goodness and self-development.

Main benefits:
1) QA testing for web project or software. Your clients will be sure that products which you created for them - will be tested and approved by QA.
2) During whole process of development, you will receive bug list with full description and improvements, which you can add.
3) Working in all most popular ticket systems, could write selenium/behat tests. Jmeter - load testing.
4) Will test in all browsers on different PC`s - if it`s web project.
5) Software project - could make stress test for application and running on different PC`s at the same

time.
6) Testing on Mobile devices.
