Personal Statement

With my experience in different IT roles I have a broad view to software development process and perform my tasks creatively and resourcefully. My colleagues can always depend on me: my commitments always transfer into results. I am hardworking and am able to work both as a team player and individually.

I am a quick learner and do not tie to any particular technology as if needed I can easily switch.

Being a member of software development team I was a part of success of big delivery projects where participated in both communications with customer and working with development team. I have implemented and supervise Quality Management System certified according to ISO 9001 standard. I also participate in educational activities allowing to prepare demanded IT specialists in a short period and with high quality.
