Personal Statement

I am 30 years old programmer who has a university degree and ~10 years of work experience in this field. I have a master's degree of computer science. I started work after the second university course. . I worked as a programmer and chief programmer.

In my studies and work time I had some experience of using different programming languages (C#, JAVA, C/C++, PHP, JAVASCRIPT, ACTION SCRIPT...). I created a variety of programs: web sites, embedded programs, desktop applications, scripts for applications (AutoCAD, Excel, SCADA's...), windows services....

For me programming is more then just a job, it's a passion of mine.
