Personal Statement

Calm, reliable, systematically minded and ISTQB CTAL-TA certified person. I have solid IT background which helps me think out of the box (black, grey or white, doesn't matter:). At the moment I am involved in projects connected with development of ERP systems for financial companies and government institutions. I am a self-starter and work well both on my own initiative and within a team environment and develop creative ideas.

Skill Stack

TOOLS

Jira 4-5 years
