### Description

*In Tia Technology, a Sapiens company, we develop both B2B and B2C software solutions that help insurance providers mitigate the complexity of their business and automate their processes.*

*We are currently looking for a QA Engineer to join the team. Tia/Sapiens is an international company with offices in multiple locations and this position is placed in Vilnius (Lithuania).*

*Join Research & Development's newest team*

*Do you want to be part of an awesome team of engineering professionals, building and delivering an award-winning insurance solution?*

- Are you passionate about automation engineering?*
- Do you have a strong desire to create software that makes a difference?*
- Are you eager to identify and suggest ways, so we can do things even better?*
- Do you have attention to details, and strive to produce top level software?*

*If you answered Yes! to the questions above, then you are the profile we are looking for.*

*Develop the automation around our next generation*

*interface in React:*

*As our new QA Engineer you will be joining one of Research & Development 's newest teams, the Workbench Squad, in our office in Vilnius. The Workbench Squad plays a significant role in developing Tia's next generation user interface. All your new colleagues are very team-oriented and contribute to an agile, dynamic, and dedicated team spirit. We are positive, with a strong "can-do" attitude and seek to create value through digitalization. We create software that makes a difference in the insurance industry and we are looking for you, who are eager to identify and suggest ways, we can do things even better.*

*You will be working in an environment that offers great development opportunities, professionally as well as personally, as well as a multitude of social activities. At Tia/Sapiens we have an informal way of communicating, while taking care of the tasks with dedication, team spirit, and humor.*

*Your main activities will be:*

- Developing the automation for our next generation interface*
- Ensuring that the software meets our quality standards*
- Creating tests plans to ensure no critical issues are introduced*
- Guiding the team to ensure best practices are established and followed*
- Identify and suggest ways to improve both the business and software*
- Follow a product development life cycle from idea, roadmap, planning, development, documentation, launching and maintenance.*

*Experienced QA Engineer with a strong understanding of automation & testing practices*

- 1+ years of experience as a quality engineer*
- Understanding of best testing practices*
- Experience working in an Agile team*
- Willingness to learn or deepen knowledge of writing automation tests (Cypress, Selenium, etc.)*
- Experience with single page applications (SPA) written in React or Angular would be a plus*
- Since we're an international company, you'll need to be comfortable communicating in English*

*What we offer*

- *A friendly and professional international team.*
- *Custom health insurance.*
- *Life/pension insurance of your choice.*
- *Bonus budget.*
- *Modern and comfortable office in Vilnius.*
