### Duration

Full time position

### Extension (project)

No

### Remotely (optionally)

No

### Expire On

2017-12-25 (Prieš 2 savaites)

Projektas nebegalioja

## Description:

There are a reported 4,000 cyber-attacks each day on organizations and have become a fundamental business threat. The threats in our interconnected world are increasingly sophisticated, pervasive, and serious. Security and data breaches are growing more routine and going undetected for longer, and the costs of detecting, containing, and defending against these threats are escalating. That is why we need you, a cybersecurity consultant.

### Basic Qualifications:

- Experience with Cybersecurity program development, security program assessment, security operations, incident response, forensic analysis, threat intelligence, identity and access management, data protection, penetration testing, Web application security testing, vulnerability and risk management, Splunk development or architecture, or security software development
- Experience with supporting Cybersecurity consulting services
- Knowledge of Cybersecurity principles, standards and frameworks, including NIST or ISO 27001/002
- Ability to travel extensively
- BA or BS degree

## Required Skills
