### Description

We are a part of an organization, which delivers world-class digital financial solutions to customers. We have an understanding that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Our teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement. One more important feature – senior leadership is present on site.

### Responsibilities

- Developing optimized automated CI/CD processes, and working with teams to implement those processes in the enterprise DevOps technology stack – Mention individual stream details (Ex., SDLC governess, next gen, testing, etc.,)
- Configure build automation to execute the CI/CD processes in a clear, maintainable manner, with high visibility into the build, test, servers, and deployment phases
- Work with application teams to help adopt continuous build, inspection, testing and deployment
- Commit to ensuring maximum uptime and optimal

performance for our customers in our Production environment

- Learn and work on new technologies and providing POCs within short span of time
- Work collaboratively and knowledge share with other divisions and corporate counterparts to foster the mind-set of continuous improvement across the environment

### **Requirements**

#### **Primary Skills:**

- 1) Minimum 5 years' experience as a DevOps Engineer
- 2) Strong Linux system administration background and Bash
- 3) Proficient knowledge of Networking & Security
- 4) Working knowledge of relational & non-relational databases
- 5) Experience with Git & CI/CD Pipelines with Azure
- 6) Strong knowledge of Dockers & Kubernetes

#### **Secondary Skills:**

- 1) Good knowledge of JavaScript & Python
- 2) Experience with Infrastructure as Code Tooling - Terraform, ARM
- 3) An in depth understanding of Public/Private/Hybrid Cloud solutions.

#### **Good to Have Skills:**

- 1) Experience with Configuration management tooling (Ansible/Chef/Puppet)
- 2) Strong development background and understanding of how applications are built.
- 3) A solid understanding of core infrastructure components: OS, Network, storage, Database, Web
