Description

Project/Client: Gaming

Location: Vilnius (4 mandatory office days per week)

Start Date: ASAP

Duration: 6 months with possible extension

Seniority: Mid-Level / Senior

Language: Lithuanian and English

Role Overview:

We are looking for a Backend Developer to join a product-focused team in the gaming industry. The role involves ownership of backend development using C#, .NET 8/9, Azure SQL, and Azure cloud infrastructure. You will contribute to scalable web-based applications, design and integrate REST APIs, and collaborate with technical and non-technical stakeholders.

Key Responsibilities:

- Key Responsibilities:
- Contribute to backend development initiatives within a dedicated technical team.
- Participate in and lead code reviews to maintain high code quality.
- Design, build, and integrate REST APIs for scalable web-based applications.
- Take ownership of technical decisions and backend architecture within the team scope.
- Collaborate with technical and non-technical

teams across the organization.

Must-Have Requirements:

- 4+ years of hands-on experience with C# and .NET, preferably .NET 8/9
- Experience with CI/CD, Kubernetes, Grafana, or APM tools
- Proven experience developing and maintaining web-based applications
- Strong experience with REST APIs, including both integration and design
- Ability to work independently, take ownership, and drive outcomes
- Proficiency in Lithuanian and English

Nice to Have:

- Familiarity with Azure, Service Bus, Docker, or Bitbucket
- Exposure to Azure AI Search or Apache Lucene
