Start Date: ASAP - 01.07.2027

Project: People Tribe

About the Role

Danske Bank is looking for a motivated **Senior Data Engineer** to join the People Tribe and help modernize the HR data landscape. You will contribute to a digital-first HR transformation by building modern data solutions that enhance workforce experiences and support the bank's broader digital strategy. This role offers an opportunity to shape next-generation data capabilities within a leading financial institution.

Key Responsibilities

- Establish the HR data foundation using Databricks hosted on AWS and take ownership of technical design and implementation.
- Build scalable and maintainable data solutions following modern engineering standards.
- Promote and apply best practices in data engineering.
- Collaborate closely with the Architecture Chapter.
- Work with business stakeholders to gather requirements and develop future-proof solutions

requiring minimal maintenance.

- Lead the technical data engineering agenda across the tribe.

Required Experience & Skills

- Proven experience working as a Data Engineer.
- Strong hands-on experience with PySpark.
- Demonstrated expertise in building data pipelines using Databricks.
- Ability to design and implement Medallion Architecture from scratch.
- Strong communication skills and fluency in English, both written and spoken.
- Ability to gather domain knowledge and requirements directly from business stakeholders.

Key Technologies

- Databricks
- PySpark
- Medallion Architecture
- AWS

Company Offers

- An inspiring environment within a large IT organization.
- The opportunity to work in an international team focused on innovative business-facing solutions.
- Extensive training and continuous learning opportunities to keep your skills current and relevant.

This position is ideal for an experienced Data Engineer who enjoys driving technical excellence, working with modern cloud-based data platforms, and delivering impactful HR data solutions.
