Aprašymas

Location: Vilnius, Lithuania — preferably hybrid, or remote within the EU / UK

Contract period: 1 October 2026 - 31 December 2026

About the Role

We are looking for an experienced **.NET Software Engineer** to join a mature, highly skilled squad working on a modern, distributed banking platform.

You will contribute to the design and development of a scalable, reliable, and secure solution built around native AWS services and high-criticality data pipelines.

Key Responsibilities

- Design and develop robust enterprise applications using **.NET 10**.
- Build modern, distributed solutions leveraging native **AWS services**.
- Develop highly scalable and reliable solutions for high-criticality data pipelines.
- Contribute to maintaining high standards of software quality, performance, and security.
- Investigate and resolve incidents, bugs, and production issues.
- Work effectively within a self-organizing **Scrum team** and contribute to an agile way of working.

- Create and maintain comprehensive technical documentation where required.
- Collaborate closely with **software architects, engineers, business analysts**, and other stakeholders.
- Contribute to the development of a modern, robust, and secure **banking platform**.
- Stay current with emerging technologies and contribute to continuous technical improvement.

Requirements

- **3-5+ years of professional experience** developing and delivering robust enterprise products or applications.
- Strong experience with **.NET 10 / C#**.
- Thorough understanding of cloud technologies, particularly **AWS**, including services such as:
 - AWS Lambda
 - Amazon S3
 - Amazon SQS
 - AWS Step Functions
 - Amazon DynamoDB
 - and other native AWS services.
- Experience with **GitHub Enterprise**.
- Hands-on experience with **CI/CD automation**.
- Experience with **Infrastructure as Code (IaC)**, particularly **Terraform**.
- Experience working in Agile / Scrum environments.
- **Bachelor's degree or higher** in Engineering, Computer Science, or a related field.
- **Upper-Intermediate English (B2+)**, both written and spoken.

Nice to Have

- Experience with enterprise-grade data platforms, particularly **Databricks**.
- Experience with message streaming / queueing platforms such as **Apache Kafka**.
- Experience working with distributed systems and high-volume data processing.
- Previous experience in **banking or other highly regulated environments**.

What You Can Expect

- Work alongside a mature team of highly skilled technology professionals.
- Opportunity to work with modern **.NET and AWS technologies**.
- Exposure to distributed systems and high-

criticality data platforms.

- A self-organizing Scrum environment with a strong engineering culture.
- Collaboration with experienced architects, engineers, and business analysts.
- Opportunity to contribute to a modern banking platform where **reliability, security, and scalability** are critical.
