### Aprašymas

New opportunity for Freelance Senior Python Software Engineer in AWS Optimization project.

#### About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

#### Responsibilities:

The consultant will work in Observability team and will:

- Deploy Python ETL code as per agreed quality standards
- Apply CLEAN Code principles
- Develop and maintain robust and scalable data

pipelines for data ingestion, transformation and loading (ETL)

- Collaborate with Architects and business stakeholders to understand their requirements and translate them into Python code

**Requirements:**

- 5+ years of Software Engineering experience with Python
- DevOps (git, CI/CD, AWS, etc.)
- Working experience with Kubernetes platform (OpenShift . EKS, etc..)
- Experience in building APIs with python (FastAPI or Django REST)

**Other important skills:**

1. Hands-on engineering experience in Observability domain - any combination of: a. metrics - Prometheus  
b. logging - ElasticSearch
2. Data Engineering experience

**Years of experience:** ~5

**Preferred start date/end date:**

- Asap. For 6 months with possible further prolongation

**Company offers:**

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
