Description:

Become a Senior member of our Vilnius team - Working on the world's leading online password manager and digital wallet which has several million customers to date.

At Zenitech you will work in a fun, English-speaking environment with people who learn and grow together every day. Collaborate with brilliant people from all around Europe, broaden your experience and contribute to systems which really matter every day.

SENIOR IOS DEVELOPER

We are looking for a talented, self motivated Senior iOS developer with a deep understanding of Apple's core iOS frameworks and a passion for delivering beautiful and smooth user interfaces. You will be a key contributor to the design and architecture of cutting edge user experience and you will help push our product to the next level. We are at the forefront of Apple technology, being consistently one of the highest-rated productivity apps. Our product has been featured in over 100 App stores worldwide. We are looking for excellent developers to help us take this huge success story forward.

With us you will:

- Create cutting edge user features for the best password manager for iOS
- Be at the very forefront of Apple technology – eg WatchKit, Fingerprint Touch ID Take responsibility for developing new features and making sure it meets iOS users' expectations
- Drive innovation and new ideas that help us improve our user experience and usability
- Be involved in Product decisions and share ownership in the company's success
- Participate fully as a member of the iOS team via our agile practices
- Collaborate with product team and Q&A to deliver high quality Software.

About you:

- At least 3 years of experience in iOS application development
- A solid understanding of CoreData, UIKit, FoundationKit, CoreAnimation, CoreGraphics
- A portfolio containing detailed work, or a github or Stackoverflow profile showing your expertise
- A foundation in computer science, strong in data structures, algorithms and software design
- Comfort in putting forward ideas and having passion for the best experience to users In-Depth
- Knowledge of Objective-C (you probably guessed that already) English proficiency to communicate complex technical issues
