Description:

For our customer we are looking for a IT Infrastructure Specialist with strong SOA skills

We search for a consultant that can be a part of the integration / deployment team, receiving the application packages from developers and wrap it into our deployment tool and deploy on test, preprod and prod. Also be a part of debugging when we have problems. Secure documentation and also operational documentation must be in place and secure knowledge transfer to our 24/7 on call team.

Preferred office location Copenhagen, Helsinki, Stockholm or Gdynia.

We value that you have experience in performance measurement and tuning both on Platform and Infrastructure layers so that you can bring extended input to the platform development. Typical skills which you will be required to practice in this position are:

Tasks:

- Install WLS in high availability/continuous availability design, both on Linux and Windows hosts on servers for all environments (dev., test, preprod and prod)
- Install, deploy and administrate SOA products; OSB, BAM, BPM.

- Configuration and tuning of WebLogic according to best practice for all environments (dev., test, preprod and prod)
- Deploy Vendor code drops on WLS for all environments (dev., test, preprod and prod)
- Migrate WLS code between environments, including preparation in production
- Identify issue and problem in WLS / Linux Servers for all environments (dev., test, preprod and prod)
- Review WLS configuration changes and support test activities related to WLS tasks for all environments (dev., test, preprod and prod)

Skills:

- WLS Expert, able to develop in Oracle WLS 11g and 12c.
- SOA expert.
- Automatic code deployment knowledge using installer tool (Nordea uses Ninjago).
- Knowledge about WLS in Operations.
- Very good communication skills in English.
- Nice to have programming skills: Unix/Linux shell.
- Nice to have knowledge of ITIL and Remedy.

As a person you possess a strong drive and have a hands-on approach to your work. You want to deliver quality solutions on time as well as driving new innovations. Working under pressure when needed is something you enjoy and you like to have new challenges to improve yourself and others.

Required Skills
