Aprašymas:

Hiring Junior Python/Odoo Developer

If you have 1-2 years experience with Python, SQL, Data Structures – you are welcome to contact us and have a chat (Odoo knowledge is not mandatory but a big plus).

Main duties and responsibilities

- Configure and customize Odoo ERP (Odoo knowledge is not mandatory but a big plus) based on requirements using reusable, testable, and efficient code;
- Implement best practices and ensure code and process quality through regular code reviews, proper documentation, and improvement initiatives;
- Ensure all features delivered are seamlessly released to the production environment and perform reliably at all time.

About Versada

We seek to help enterprises digitize their business processes and improve employees workflows with Odoo ERP. More information: www.versada.eu.

- We pay for your experience: hourly rate, bonus system, open wages;
- Ideal working conditions: 4-day-work week, ability to work in Kaunas or Vilnius office (Lithuania), or remotely;

- Great and professional team: open minded culture, flat organization structure, technical team;
- Team buildings and workations, monthly breakfast, annual summer camps.

Apply by sending your CV via info@versada.eu
