## Description

We are a part of an organization that delivers world-class digital financial solutions to customers. We have an understanding that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Our teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions.

**Responsibilities:**

- Analyze and develop Mainframe z/OS applications using PL1/DB2/JCL/COBOL/CICS.
- Design, develop, document, and implement new programs and subprograms, as well as enhancements, modifications, and corrections to existing software.
- Develop testing and debugging routines and oversee execution.
- Create documentation and procedures for maintenance.
- Build and maintain relationships with various squads and third parties on software development or support issues.
- Understand the positioning of a solution within the company and build a plan to effectively gain buy-in from all participants.
- Identify opportunities for further enhancements and refinements to standards and processes.

**Requirements:**

- Working experience and knowledge of PL1, DB2,

JCL, COBOL, CICS, MQ, and IBM utilities.
- Cross-platform knowledge on API, REST protocols, and Api Connect.
- Process-oriented with strong analytical and problem-solving skills.
- Ability to work independently with minimal supervision.
- Good communication skills.
- Positive attitude towards work and deliverables.
- Open mindset to work with the team in an agile setup - tribe/squad.
- Years of experience 6+.

**Preferred start date/end date:**

ASAP for 6-month assignment + option for prolongation up to 6 months.

**We Offer:**

- An inspiring environment in a large IT organization.
- Work in an international team that concentrates on innovative business-facing solutions.
