Description

Role Overview:

We are looking for an experienced **QA Lead** to take ownership of **QA processes**, strategy, and delivery quality across two live products — a **Chat** platform and a **Loyalty / Coupon** system — running in multiple markets. The role requires strong **manual testing** expertise, a solid grasp of **test automation**, and the ability to lead a small **QA** team while bridging developers, managers, and the client.

Key Responsibilities:

- Define and implement **QA strategy**, testing plans, and structured **QA processes** across both products.
- Lead and mentor a team of **3 QA specialists**, driving quality standards and best practices.
- Identify and automate — or recommend **automation** approaches for — repetitive tasks such as **regression testing**.
- Establish and track **KPI-driven** quality metrics to continuously improve delivery performance.
- Serve as the key communication link between developers, **QA**, product managers, and the client.

Must-Have Requirements:

- Proven experience as a **QA Lead** with hands-on team leadership responsibilities.
- Strong **manual testing** skills with experience in test planning, strategy, and process design.
- Solid understanding of **test automation** — able

to automate or guide automation of repetitive workflows.

- Experience defining and tracking **QA KPIs** and quality metrics.
- Comfortable working with developers, managers, and clients in a multi-product, **agile** environment.

Duration: 6 months with possible extension.
