## Description

Senior Android Software Engineer is responsible for the design, development, and maintenance of Android native software applications using Kotlin and Java. The Android Software Engineer will be involved in all aspects of the software development life cycle, including requirement gathering, design, development, testing, and deployment. Strong technical skills and experience with Android SDK and Android Studio are essential for this role. Good knowledge of Software Development Lifecycle, automated testing and DevOps stack are also important. The Android Software Engineer will also have to collaborate with other team members, including other software engineers, product managers, business analyst and stakeholders to deliver high-quality software on time.

### Key Responsibilities:

Participating in agile ceremonies such as sprint planning, stand-up meetings, and retrospectives.

Collaborating with other team members to gather and understand requirements for new features and enhancements.

Developing and maintaining Android Native mobile applications using Kotlin, Java, Android SDK and Android Studio.

Familiarity with RESTful APIs to connect iOS applications to back-end services.

Experience with performance and memory tuning with tools.

Understanding of Google's design principles and interface guidelines.

Writing unit tests and integration tests to ensure code quality and maintainability.

Participating in code reviews and providing feedback to other team members.

Familiarity with cloud message APIs and push notifications.

Proficient understanding of code versioning tools such as Git.

Troubleshooting and debugging issues.

Continuously improving the software development process and practices.

Communicating with stakeholders and other team members to ensure project goals are met.

Keeping up-to-date with the latest technologies and industry trends to improve the software and the development process.

### **Job Requirements:**

Solid working experience with: Kotlin, Java, Android SDK, Android Studio

Nice to have experience working with: Azure, AWS, automated testing.

### **What we offer:**

Opportunity to be part of a global organization.

Encouraging working atmosphere, engaging activities, and extra benefits (e.g. additional medical insurance (covers gym subscription), team events, outreach activities, and others);

Hybrid work model with remote work opportunities ( 3/5 days weekly from the office)

Open, modern, and ergonomic work environment when working from the office with the multicultural community.

Opportunity to grow professionally and personally (e.g. Udemy) and continuously develop within the domain.

The salary range for this position is  
from 4.485 to 5.950 EURO gross before taxes.\*
