Description

Contract Details:

- **Duration:** 2 months (with potential for extension)
- **Location:** Lithuania
- **Language Requirement:** Lithuanian
- **Work Arrangement:** Remote or onsite options available
- **Eligibility:** Must be authorized to work in Lithuania
- **Start Date:** ASAP

Project Overview: The selected candidate will join the IT team of a debt recovery company to support the development and maintenance of a complex information system used internally for debt recovery operations. The role will involve integrating with national services, including Registrų Centras, Regitra, and Creditinfo, and working on an API for external system access. The primary focus is on developing secure, efficient processes for both internal operations and external users involved in debt registration.

Key Responsibilities:

- Develop and maintain back-end services using PHP 8.2 and Symfony 6.4.
- Integrate and optimize database structures with MariaDB.
- Implement caching and messaging solutions with

Redis and RabbitMQ.

- Ensure code quality with PHP CS Fixer, PHPStan, and PHPUnit.
- Manage CI/CD processes in Bitbucket for streamlined deployment.
- Oversee integrations with external systems, maintaining robust, secure connections.

Requirements:

- **Experience:** Senior-level with 5+ years in PHP development, particularly with Symfony.
- **Technical Skills:** Strong proficiency in PHP 8.2, Symfony 6.4, MariaDB, Redis, RabbitMQ.
- **Tools:** Experience with PHP CS Fixer, PHPStan, PHPUnit.
- **CI/CD:** Familiar with Bitbucket CI/CD workflows.
- **Language:** Fluent in Lithuanian.
- **Soft Skills:** Strong analytical skills, attention to detail, and the ability to work effectively both independently and as part of a team.
