Description:

Danske Bank Group IT Lithuania (DGITL) is a part of an organization, which delivers world-class digital financial solutions to customers. DGITL is newly established IT site operating from the end of 2014 but it is already the fastest growing IT organization in Lithuanian market. We have an understanding that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank.

DGITL teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement. One more important feature – senior leadership is present on site.

Job Description

Our Collaboration Technology teams need a Senior Software Engineer to contribute to the eMail Routing & Automation project, which purpose is to move email self-service and automations from IBM Domino to the new target platforms (.net core Web API's/Micro-services as backend + ServiceNow as front-end). We are looking for a professional back-end developer with

excellent C# skills to develop high-quality IT solutions. The successful applicant will work closely together with IT infrastructure and development teams, business analyst, test manager, infrastructure architects, and user interface providers.

Responsibilities:

- Acquire in-depth understanding of a given domain
- Translate business needs into IT solutions
- Independently perform project-assigned SW development tasks with support from the project's co-workers
- Take responsibility for delivering high quality in all solutions
- Cope efficiently with several different assignments at once
- Create SW solutions with high usability, performance, scalability, sustainability, stability, maintainability, availability and resilience
- Contribute to knowledge sharing within the project and Collaboration Technology teams
- Help other software engineers in the team

Requirements:

At least three years of experience in software engineering

- Practical experience with different IT systems
- Professional skills in C#
- Experience with designing databases (MS SQL)
- Experience with building Web Services with authentication and authorization Experience with IIS
- Experience with RabitMQ
- Experience with code integration to other web services/API's, Powershell, Exchange Web Services, Active Directory and SQL databases
- Experience with code integration to ServiceNow (optional)
- Experience with IBM Notes and Domino (optional)
- Experience with IBM apiconnect (optional)
- Knowledge of HTML, CSS and JavaScript (optional)
- Good English language skills (all written and oral communication will be in English)
- Analytical and conceptual thinking skills
- Strong communication & cooperation skills
- Planning and time management skills
- Responsible, self- organized, and result-oriented
- Experience in the banking or related area would be beneficial

We Offer:

- An inspiring environment in a large IT organization
- A perfect opportunity to face the challenge and the opportunity to influence and shape the bank's future IT solutions
- Work in an international team, which concentrates on innovative business facing solutions
