Description

Client: Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

The location is Vilnius; Hybrid mode (negotiated individually regarding remote opportunity). Remote candidates from Lithuania are welcome.

The consultant will work in Observability team and will:

1. Develop and maintain internal tools and applications using Angular and

TypeScript.

2. Collaborate with architects and business stakeholders to understand their requirements and translate them into effective front-end solutions.

Requirements

- 4-5 years of software engineering experience with Angular and TypeScript.
- Proficiency in NgRx (mandatory) and RxJs (mandatory).
- Familiarity with Jest for unit testing.
- Experience with NX for workspace management.
- Proficiency in Angular Material for UI development.
- Understanding of AWS and OpenShift (nice to have).
- . Knowledge of Tanstack is nice to know

Required Skills

JAVASCRIPT

TypeScript 5-6 years Angular.js 5-6 years
