No

Expire On

2017-12-31 *(Prieš 3 dienas)*

Description:

Lenndy.com operates as a lending marketplace where registered investors can purchase claim rights of the underlying loans. It is similar to crowdfunding except for the fact that loans are already issued to borrowers by loan originators. Lending marketplace is considered to be more advanced compared with traditional crowdfunding platforms as borrowers receive funds much quicker. Moreover, investors feel more secure because loan originators sell only up to 95% claim rights of the underlying loans. Loan originators have years of industry experience and competencies to issue best quality loans.
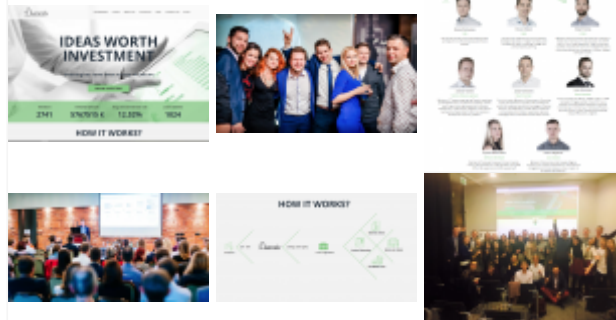

Loan originators currently offer four types of loans on Lenndy for registered investors:

• Real estate development loans;
• Secured car loans/lease;
• Invoice financing;
• Working capital business loans.

Lenndy operator provides secure technical solutions for

clients as well as main information regarding the loan and the borrower such as:

• Borrower's activities;
• Financial situation;
• Loan information;
• Collateral and guarantees;
• Etc.
