### Current status

Working (Hit me with offer) (Updated: 5 months ago)

### Workload

100%

## Personal Statement

More than 13 years in IT industry has made me an experienced professional in my field. I have worked as a Programme/Project Manager for a number of companies, providing strategic solutions for technology, sales and marketing projects. I have worked in the area of Business Intelligence & Business Processes for several years (partnering initiatives and university-business projects); therefore I am familiar with analysing and designing business processes and change management. I have been working on projects of various scope and time frame, most of which involved collaboration and negotiation with third parties. I am also used to working in a multinational environment as I have experience in managing multinational teams of 30-50 people both home and abroad.

As a person I am very pro-active and strongly motivated employee - I dedicate myself entirely to the project I am working with. I have experience of working within a limited temporal and financial frame. I am flexible and I can easily adapt to the new environment and specific requirements. Communication and negotiation skills are my major strengths in projects involving external business partners. I am ambitious and looking forward to use my knowledge in continuing good cooperation with clients while managing project to success.
