Java Software Engineer

Expert (+10 years experience) | Developer, Manager/Lead, Architect

Working (Hit me with offer) | Dhaka, Bangladesh, Lithuania

Sector Background

Telecommunication, IT Company, Technology Startup

Preferences

Location

European Union only

Duration

Full-time position

Current status

Working (Hit me with offer) (Updated: 1 month ago)

Workload

100%

Personal Statement

I am working in an innovative project for Norwegian logistics sector using Spring, Spring Boot, Spring Cloud, Mongo. Before that I worked as Lead Software Engineer for one of the top premium mobile advertising company in Europe, based in Sweden, for last 3 years, developing order, campaign, advertisement management software, which manages 95% revenue of the company, increasing workflow efficiency by 900%.

I have overall 10 years of large-scale software development experience mostly in European companies, used by large companies including BBC, CNN, Aljazeera, Telenor.

As certified scrum master, I have successfully implemented Scrum in my company to maximize the team output of distributed teams. Being a software architect, I always follow the best practices to build the maintainable and scalable solution.

With my experience and knowledge, I shall be able to immediately contribute in development. I am always eager to learn new technologies and work harmoniously in a multicultural environment.
