Personal Statement

How could you describe the job of your dreams? It is easy for me - friendly, funny and open minded colleagues, supportive and intelligent supervisor. If a company has those values, motivating salary comes along.

I am not afraid to face new challenges, because i believe there is no man in the world, who was born knowing everything, but i believe everyone can become professional if he is curious enough and gets support from colleagues and supervisors, as a team work is likely most important thing in a company.

I like to share my opinion with colleagues and give advices if i feel competent to do that. I am not afraid to ask questions that could look stupid for others, because honesty is very important thing in a company life. This is why i admit my mistakes and take notes and criticism no meter how hard it would be.

Colleagues likes me for my charisma, sociability and a smile. Supervisors respects my reasoned opinion, likes my honesty, curiosity and willing to become a professional of my position.
