Personal Statement

Hello

I worked privately for a long time with computer technology by myself. I started it from school days (twelve years ago).

Removing physical failures: changing parts for newer or broken ones, performing soldering and other minor repairs. I also install the operating systems (Windows, Linux), optimize computers for work, prepare / install the necessary programs.

I graduated from the web developer training program. And since September, I have started to deepen the networking knowledge for studying at the Kaunas School of Information Technology under the Computer Network Adjuster Program, which lasts for a year.

Prior to my acquisition of networking experience, I organized computer games tournaments. I worked with network equipment. I also had to work with the wireless network equipment abroad, working there as a network equipment logistics agent, and preparing them for work according to the client's wishes.

It would be very good if I could work and study. I hope to receive your call.
