Personal Statement

Freelance web developer/supporter and server administrator for almost 5 years. Have experience working with various loads of traffic (haven't experience in huge workloads, but I feel ready to start handle it) Currently have 1lvl higher educations = College degree in IT. Other things I need I learn by doing and with additions online courses. In my opinion that is a huge advantage for me, and shows that I'm eager to learn and can learn in the process.
