Personal Statement

Dear Sir or Madam,

We are two developers from Team Devario interested in remote programming work and we always looking for new experience in different spheres of developing and managing from simple web solutions to enterprise level projects. Programming is in our blood, it makes us passionate about our work and this is what makes our services professional. Developing websites for more than 5 years each has taught us a lot about what it takes to make a professional website or a service. We're working with cutting edge technologies and we cover both front and back ends. Agile is not new to us. Team leading and making solutions from scratch is not a problem too. We are located in Lithuania but we seek for international projects that we could be proud of.

If you require 2 developers we would be interested in such a job offer but if this does not interest you – you can hire one of the team members.

Our working skills consist of 5 years or more in: PHP, CSS, HTML, and JavaScript. Advanced level of Laravel, AngularJS, jQuery, AJAX, Frontend frameworks, Bootstrap, Jira, Agile Methodologies and many more. E-commerce and CMS systems like Magento, PrestaShop, WooCommerce, Wordpress.

Test driven development and smoke testing is what we think offers the best product delivery which reduces bugs drastically.

Our tool set consists of sentry.io, envoyer.io, Jenkins, GIT versioning, Amazon web services, RabbitMQ, MongoDB, Linux, Nginx, Elasticsearch.

We are looking forward in working with you.

Thank you in advance!

Yours sincerely, Team Devario

Skill Stack

PHP		WEB	
WordPress 3-4 years		Ajax 3-4 years	
Laravel 2-3 years		CSS3 3-4 years	
Magento 1-2 years		Bootstrap 3-4 years	
Cake 1-2 years		JSon 3-4 years
