Application Developer (Java + document management)

HITCONTRACT

www.hitcontract.lt

Recruitment & Selection operating in Vilnius, Lithuania

Start: ASAP

Description:

We are looking for a Application Developer for our client.

The duties of the Developer will include the definition, implementation and testing of solutions and applications and to be an active member of the development team. The team will be newly formed for this case. Project is about continuing already begun implementation of a database system entity that carries for example case and document management. The mission is to define, plan, implement, test and deploy the continuation of the case. There may be also other tasks related to the delivery

project.

Work is done in agile methods in a team of approx. 10 people and will last at least by the end of 2018. You can choose whether you would like to work at the client's premises in Helsinki or Espoo or remotely.

Duties:

- Definition and assessment of User Stories
- Sprint planning
- Identification and definition of set Tasks
- Identification and definition of Architectural tasks
- Identification and definition of touch points
- Coding, documentation, testing and QA tasks
- Other duties defined by the customer

Takes part in

- Risk Management
