### Aprašymas:

Arxan is trusted by over 500 global enterprises to secure their high-value apps. Their protection and deployment solutions protect applications at the source and binary code level to expand the area of trust and deliver the industry's most comprehensive app-level protection against a broad range of threats.

They recently joined the Digital.ai team and expect to expand their product offerings as they continue to grow. Join their talented and mission-driven team and help them fulfill their vision of a world where bad actors seeking to compromise their customer's most valued apps are always unsuccessful.

#### **What they are Looking For:**

This position represents an exciting opportunity to join a growing industry leader with a diverse product line specializing in protecting the mobile economy.

They are looking for a well-motivated Software Engineer with a passion for technology and learning to join their team in Vilnius.

As a C++ Software Engineer, you will join an existing team developing state of the art software protection technologies to protect Android mobile apps from reverse engineering and tampering. You will gain exposure to software protection techniques and have the opportunity for research and innovation to help

develop new techniques in this field. Their products are used by top tier companies whose products and services you are probably already using so awareness and responsiveness to customer needs is paramount. They are a well-integrated global team with plenty of scope for career development and the opportunity to work on other products.

**Requirements:**

- Minimum 3 years' experience developing in C/C++ on Linux, Mac OS X, and/or Windows
- Some experience of Java or Android app development
- Experience working with x86 or ARM assembly
- Bachelor's degree in Computer Science, Computer Engineering, or equivalent
- A collaborative working style, and the ability to work with other team members, company stakeholders, and customers
- Self-motivated, with the ability to accomplish tasks with minimal guidance
- Strong interest in application protection
- Attention to detail
- Strong diagnostic, problem solving and communications skills
- Very good proficiency with spoken and written English

**Desired Skills/Experience:**

- Deep knowledge of the function of compilers, linkers and loaders
- Experience developing cross-platform applications
- Familiarity with Python, Perl, or other scripting languages
- Experience with reverse engineering
- Familiarity with one or more binary file formats
- Knowledge of Android build tools
- Interest in cryptography
- Experience of Python and/or Unix automation

**Their Culture:**

As a small team, each of them have the opportunity to have a direct impact on their growth as a company and the success of their customers. They are guided by four key principles:

Passion – for their mission and the success of their customers. They put learning, excellence and integrity at the forefront of all that they do and they are leaders

in their field because of it.

Play to Win – going “all in” to exceed expectations. They focus on what can be achieved, taking intelligent risks to anticipate new threats and pursue innovative solutions.

Get Stuff Done – seeing obstacles as opportunities. They operate with velocity and focus to ensure their results are amazing.

Collaboration – because they are all in it together! They put the success of their team above their own and embrace diverse ideas and perspectives, treating each other with respect.

**They Offer:**

- Opportunity to work in an international company
- Informal work environment
- Competitive salary and potential for performance-based bonuses
- Unifying events and team buildings
- Team meals and snacks in the office
- Private health insurance
- Referral bonus
- Team lunch every Friday
- Parking space
- 6 paid sickness days per year
- Flexible working hours

**Reikalinga Patirtis**
