Description:

You will become a part of the team in AML – Transaction and Screening area which is shaping the future defense against financial crime through prevention, detection and mitigation of financial crime activities. Danske Bank group. The overall purpose of the initiative is to strengthen AML efforts in the bank. Current we are seeking a contractor to deliver state of the art Fraud prevention system and embark on our common journey

We are a part of an organization, which delivers world-class digital financial solutions to customers. We have an understanding that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Our teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement.

Responsibilities:

• Take responsibility for solutions (from design to deployment)

• Inspire colleagues by setting an example of

professionalism and proper work ethics

• Contributing to evolution of technology and software development practice stack

Requirements:

• 3+ years' of experience in DevOps (development/support/administration of IT systems)

• Experience in Linux administration

• Cloud infrastructure

• Solid communication skills and good English language

• Motivation about delivering well-designed, optimized, and scalable solutions

Would be an advantage:

• Cloud service management toolset - Chef/Jenkins/Terraform/Drone/Docker/Kubernetes/Openshift

• Knowledge in .NET Core

• Experience in MongoDB administration

We Offer

• An inspiring environment in a large IT organization

• Work with the solution developed in Cutting edge technologies

• Work in an international team, which concentrates on innovative business facing solutions

• An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
