## Description

Behalf of our client, we are looking for Freelance Android Developer.

**Project/Client:** consumer electronics

**Location:** Lithuania (remote/hybrid possible)

**Start date:** ASAP

**Duration:** 3 months

### Role Overview:

Join a dynamic team to design and build advanced **Android applications** for a high-tech consumer electronics project. You'll collaborate with cross-functional teams, work on new feature delivery, and help boost app performance and stability.

### Responsibilities:

- Develop and enhance **Android applications (Kotlin, Jetpack Compose)**
- Integrate with **remote data sources** and **APIs (REST, JSON)**
- Ensure code robustness and app reliability through thorough unit testing
- Troubleshoot, fix bugs, and improve overall performance

### Must-Have Requirements:

- 4+ years of **Android development**, strong in **Android SDK and Kotlin**
- Experience with **MVI/Redux, Jetpack Compose**, and popular third-party libraries (e.g., **Dagger2, Retrofit, OkHttp, Glide**)
- Working knowledge of **mobile app architecture** and **development lifecycle**
- Experience with **unit testing (JUnit)**; familiarity with **Espresso/Robolectric** a plus

**Nice to Have:**

- Experience with Kotlin Coroutines and Flow
- Familiarity with CI/CD practices
- Apps published in Google Play

## Required Skills

**MOBILE**

Android 4-5 years

**PROGRAMMING**

Kotlin 4-5 years
