Description

New opportunity for Freelance Data Engineer for Profitability Block.

About Danske Group IT

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

Responsibilities:

- Design, build, and maintain ETLs and infrastructure required for data processing, analysis, and integration across various systems.
- Build robust and efficient data pipelines
- Ensure data integrity and quality by implementing data validation and cleansing processes.
- Define best data engineering practices in the Tribe through collaboration with Chapter Leads, Architects,

Engineers and Data Engineering Guild.

- Collaborate with cross-functional teams to identify and implement system improvements and new features.
- Act as a subject matter expert in the Tribe for Data Engineering related questions consulting other squads and engineers on most complex solutions.

Requirements:

- 5+ years of experience working as a Data Engineer with strong understanding of ETL processes, relational databases, and data modelling.
- Ideally you have been a leader with engineering background for some years or at least have a strong inner drive to lead a team of engineers and grow your leadership skills.
- Strong proficiency in programming languages such as Python, Java, or Scala. Python is preferred.
- Experienced in working with ETL tools like SSIS, IBM Data Stage, Informatica, AWS Glue etc. to develop data pipelines ingesting data from structured / semi-structured data sources. AWS Glue is preferred.
- Experience with managing infrastructure, servers, and clusters on on-prem cloud platforms and public ones such as AWS, GCP or Microsoft Azure. AWS is preferred.
- Excellent problem-solving and communication skills, ability to explain IT lingo to non-technical colleagues in a simple manner.
- Bachelor's degree or higher in Engineering or Science

Additional great to have:

1. Innovative and creative problem solver.
2. High performer
3. Curious to learn and try new technologies.
4. Have a "Can do" mentality.
5. Open-minded team player

Years of experience:

5+ years of experience.

Preferred start date/end date:

- Period: Asap-ongoing

Company offers:

- Remote work - Partially
- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
