## Description

New opportunity for Freelance IT Database Chief engineer – IBM DB2 LUW.

### About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

### Responsibilities:

The consultant will work with Join Database Engineering Team and will:

1. Architecture Design: Designing robust, scalable database solutions that support the organizational needs.

2. Technology Evaluation: Assessing and recommending database technologies and tools that could benefit the company.

3. Database Setup and Configuration: Installing and configuring IBM DB2 LUW databases, setting up replication, partitioning, and other advanced configurations to optimize performance and resilience.

4. Performance Tuning: Monitoring system performance and adjusting indexes, queries, and configurations to improve throughput and response times.

5. Security Implementation: Ensuring that database access is securely controlled, and that data is protected against unauthorized access or breaches. This includes implementing encryption and auditing policies.

**Requirements:**

- IBM DB2 LUW experience
- IBM Q replication experience
- IBM Change Data Capture replication experience
- Linux Engineering experience
- Windows server Engineering experience
- AWS Engineering experience DevOps (git, CI/CD, etc.)
