Description

New opportunity for Freelance .NET engineer with AWS.

About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

Responsibilities:

1. Technical Expertise:

a. Utilize in-depth knowledge of .NET, C#, ASP.NET, Web API, Microservices, CQRS, TDD, SQL, Monitoring, and Observability.

b. Good exposure on PubSub and Kafka streaming services to improve system performance and reliability.

2. Development and Operations:

a. Implement CI/CD and DevSecOps methodologies to

streamline and secure software delivery processes.

b. Leverage Terraform and expertise in containerized/cloud-native applications, adhering to Security Development Lifecycle (SDL) principles.

3. Kubernetes and AWS Experience:

a. Demonstrate at least 4 years of experience with Kubernetes on AWS, ensuring robust and scalable cloud operations.

4. Industry Experience:

a. Utilize experience in the financial sector or other regulated industries to enhance compliance and security measures.

5. Customer Focus:

a. Drive customer-first approaches in cloud solutions, informed by experience with customer journey products and services.

6. Collaboration and Innovation:

a. Work collaboratively with cross-functional teams to optimize cloud infrastructure and drive technological innovation.

Requirements:

Technical Skills:

1. Proficiency in cloud platforms such as AWS, Azure, or Google Cloud.
2. Strong understanding of cloud architecture and services like containers, microservices, and serverless computing.
3. Experience with infrastructure as code tools like Terraform or CloudFormation.
4. Familiarity with DevOps practices and tools such as Jenkins, Docker, Kubernetes, etc.

Programming Knowledge:

1. Proficiency in programming languages such as C#
2. Understanding of APIs and web services (REST, SOAP).

Security Awareness:

1. Knowledge of cloud security best practices and tools.
2. Understanding of compliance and data protection regulations.

Problem-Solving Skills:

1. Ability to design scalable, reliable, and efficient cloud solutions.
2. Strong analytical and problem-solving skills.

Years of experience: 5+

Company offers:

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis.
