Aprašymas

We are looking for **Mid-Level Python Developer** to join a GPS monitoring solutions project. The role involves designing system architecture, developing software, automating deployments, and ensuring system stability through monitoring and performance analysis.

Role Overview:

- **Project/Client:** GPS Monitoring Solutions
- **Location:** Vilnius, Lithuania (Office 3 times per week)
- **Start Date:** Mid-April 2025
- **Duration:** Until December 2025

Must-Have Requirements:

- Proficiency in **Python 3**
- **Experience with asynchronous frameworks (Aiohttp, FastAPI, Tornado)**
- Strong understanding of **RESTful API** principles
- Familiarity with **DevOps methodologies** and tools
- Hands-on experience with **Kubernetes (K8s)** and **ArgoCD** for deployment automation

Nice to Have:

- Experience with asynchronous libraries and unit testing
- Knowledge of NoSQL and NewSQL databases

- Background in big data and statistical data processing (time-series data)
- Understanding of authentication and authorization mechanisms (JWT, OAuth, SAML, LDAP)
- Experience designing and maintaining CI/CD pipelines
- Familiarity with monitoring and alerting tools (Grafana stack)

Required Skills
