Aprašymas

New opportunity for Freelance Senior Data Engineer in Transaction Analysis and Models Squad.

About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

Responsibilities:

• Build and manage data integration processes, ETL workflows, and data pipelines to handle large data streams.

• Create data models and structured data solutions to maintain high standards of data quality, consistency, and reliability.

• Ensure optimal performance of data pipelines for

streamlined data retrieval and processing.

• Integrate raw information from various sources, demonstrating your ability to work with diverse data sets.

• Work closely with other data professionals to form robust data governance, validation, and development practices.

• Stay updated with the latest technological advancements in data engineering to ensure maximum efficiency and software quality.

• Engage actively in a self-organizing Scrum team, exhibiting your agile mindset.

• Recognize the importance of comprehensive documentation and contribute when necessary to foster knowledge sharing within the team.

Requirements:

• You have a minimum of 5 years of experience as a Data Engineer, Data Scientist, or a similar role.

• You are familiar with the Big Data Ecosystem, including Cloud technologies.

• You have expert-level Python skills, along with intermediate proficiency in PySpark, Hadoop, Hive, Airflow, and SQL. Experience with AWS technologies will be an added advantage.

• You have hands-on experience in optimizing the performance of Spark processes.

• You display keen analytical thinking and attention to detail. Your strong communication and interpersonal skills facilitate smooth collaboration with squad members and stakeholders.

• You possess strong business acumen, understanding how technical improvements contribute to business value and drive organisational success.

• You carry an agile mindset, open to adjustments based on new requirements, information, or evolving team needs.

• You have a Bachelor's or Master's degree in a STEM-related field or equivalent.

Years of experience: 5+

Company offers:

• An inspiring environment in a large IT organization

• Work in an international team, which concentrates on innovative business-facing solutions

• An extensive training program to ensure that your skills are maintained and updated on an ongoing basis.
