Description

We are seeking an experienced Fullstack Developer to join our team to continue the development and modernization of several existing applications and systems, as well as contribute to the development of a new Java/Angular-based application.

Must-Have Requirements:

- Proficiency in Angular development (the most crucial requirement);
- Experience with Java development;
- Knowledge of deployment methods including Kubernetes, containers, OpenShift, and Jenkins;
- Experience building applications from scratch.

Preferred:

- Previous experience with memory databases;
- Familiarity with full-stack development;
- Experience with auto-test frameworks;
- Ability to implement automated tests and unit tests;
- Familiarity with Scrum methodologies.

Required Skills

JAVASCRIPT

Angular 3-4 years
PROGRAMMING
Java 1-2 years
