Description

Danske Group IT is a part of an organization, which delivers world-class digital financial solutions to customers. They have an understanding that the current change is Technology-driven, and they prioritize IT as a key component for success in their journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement. One more important feature –senior leadership is present on site.

About the role:

Consultant will be part of the SRCF team, who offers compliance and formal management services of the IT and Cyber security control framework. From a functional perspective consultant will primarily manage the governance of their processes and security documents (Instructions and SOPs) to the IT controls managed by SRCF. In addition to this consultant will support the maintenance of the IT controls belonging to stakeholders in the bank. Consultant will get the chance to take an active role in shaping the future of security of the bank. They work in a dynamic and complex environment, where consultant will get the chance to take responsibility from day one.

Responsibilities:

- Management, maintenance and support in regards to process optimization
- Governance
- Security Instructions and SOPs
- Documentation, awareness and training
- Supporting colleagues in SRCF team with process and documentation optimization
- Supporting colleagues in ITBRC with internal and external communication tasks related to the official documentation of the SRCF
- ISF SOGP 2020, ISO27001

Requirements:

- Outstanding project and stakeholder management skills, being able to manage and support projects and to navigate a complex and changing organization.
- Having experience in information security, and understanding security policies and frameworks such as ISO, NIST, ISF represents an advantage
- have an agile mindset, being able to adjust to multiple demands, shifting priorities, ambiguity, and rapid change
- technical acumen, and are familiar with Tableau and other business intelligence tools

Company offers:

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
