Description:

About the product

The Video Service Assurance Monitor system segments video problems by proactively monitoring video, VoIP, and HSD carriers for RF and MPEG impairments to ensure QoS. To ensure QoE, the VSA Monitor system also provides monitoring of Adaptive Bit Rate (ABR) VOD delivery, loudness of AC-3 audio streams and Closed Captioning (CC) to the end-user.

Requirements

- Object oriented development understanding.
- Experience in Java J2EE development.
- Extensive experience working with J2EE application servers and application containers;
- Experience in Web/JavaScript development.
- Experience in working with some of the popular front-end libraries or frameworks (preferably ExtJS, JQuery, but any other framework/library is highly valued too).
- MySQL.
- Experience working with any OR/Mapper would be an advantage.
- Experience working Spring framework would be an advantage.
- Understanding of Agile processes.

- Fluent communication in Lithuanian and English.

We offer

- Extremely friendly, professional team of people.
- Great opportunities to grow professionally.
- Competitive salary and benefit policy.
- Agile Environment.
