Description

We are seeking a developer skilled in **Java** and **Angular** to build and maintain web applications in the **banking** sector. The role focuses on **microservices architecture**, legacy system modernization, and ensuring application stability through **monitoring** and **incident management**. You will also support deployments, automation, and system optimization.

Key Responsibilities:

- Develop applications using **Java** and **Angular**
- Implement **microservices architecture**
- Handle **incident management** and monitoring (**New Relic**)
- Perform deployments and **change management**
- Create automation scripts (**cron, shell**)

Must-Have Requirements:

- Minimum **3+ years of experience** in web application development
- Strong skills in **Java, Angular, and SQL**
- Knowledge of **SOLID principles** and **OOP**
- Experience with **microservices architecture**
- Familiarity with **monitoring tools** and incident handling
- Experience with deployments, documentation, and automation
- Good command of **English** (written and spoken)

Nice to Have:

- Experience with **Progress OpenEdge**

- Experience with **Drupal**

Required Skills

PROGRAMMING

Java 3-4 years
