Aprašymas:

We are seeking to find the best specialist and developers to work with our professional developers team in Versada. We are looking for Junior Python Developer, Senior Python Developer and Solution Engineer. We value interesting international projects, management and colleagues having technical background and ability to enjoy our work. Be a part of the best Python and Odoo specialists team at Versada.

Job description:

Currently we are looking for Python Developer who will work with Odoo ERP system and various local and international projects.

Currently we are searching for a developer, who:

- has Python knowledge;
- additional skills preferred:
HTML/CSS/Javascript/PostgreSQL/Odoo
- has good written and spoken English skills;

Perks of Versada:

- We pay for your experience: hourly rate, bonus system based on annual profit share and additional bonus system for developers, open wages;
- Ideal working conditions: flexible working hours, ability to work in Kaunas and Vilnius office or remotely;

- Headquarters office in Kaunas situated in one of the newest business center ARKA with a view to Nemunas island, working 24/7;
- Great and professional team: open minded culture, flat organization structure, all management have technical background;
- Team buildings and workations, free monthly breakfast, annual summer camps, daily snacks and other office perks;
- Ability to devote 20% of the time to work on any task of your choice;

Versada seeks to find the best specialists and maintain positive and flexible working culture inside the company. We value our colleagues, no corporate structure in the company and ability to enjoy working from modern offices in Kaunas or Vilnius or even remotely from your favorite place in the world.

Are you interested in joining our professional and open-minded Versada team? Let's have a chat! We will tell you more.
