## Description:

Come work at Track-POD, the leading company in logistics software industry in the UK, EU and North America. We are looking to hire an Experienced IOS Developer to join the Track-POD team. If you're serious about your next job, Track-POD is an ideal company for you. The company has offices in England, Belarus and Lithuania.

If you like working in a fun environment, take full ownership and responsibility to deliver tangible results, Track-POD is the right place for you! We are looking for a **Senior IOS Engineer**, to join our engineering team. You will design, develop, and maintain the Track-POD Mobile Applications.

In this role, you will be working closely as part of a smart and collaborative team that is developing highly scalable cloud-based delivery solutions for small and medium/large businesses.

**Monthly salary (bruto):** From 3500 to **6000€**

**Responsibilities:**

- Building a highly reliable mobile application for our users and customers
- Planning and designing effective and elegant solutions to support a rapidly growing customer base (millions of users)
- Full ownership of entire engineering stack required to deliver features and results to business stakeholders and customers
- Collaborate and work with our small knit engineering team in an Agile environment
- Establish good engineering practices and mentoring other team members

**Required Skills:**

- A minimum of 5-7 years' experience in building mobile based applications that target millions of users using IOS technologies
- Strong B2B software development experience with demonstrable results necessary
- Experience with large, high volume SaaS infrastructures
- Expertise in Objective-C, Swift, REST API
- Clear understanding of targeted mobile devices' features and the IOS operating system
- Good knowledge of mobile application features in the IOS (iPhone/iPad) environment, as well as a thorough understanding of its life cycle and operating modes
- Experience with multi-threading, thread synchronization
- Experience with distributed version control systems

P.S. You need to share your proven projects in the App Store and include them in your CV

## Required Skills

MOBILE

IOS 5-6 years

C++

Objective C 5-6 years

PROGRAMMING

iOS Swift 2-3 years
