Aprašymas

We are looking for a **Senior Java Developer** to join a **fintech** project focused on scalable backend systems, data integration, and **event-driven architecture**. The role involves developing **Java / Spring Boot** microservices and working with data streaming and/or **Data Warehouse** solutions.

Key Responsibilities:

- Design, develop, and maintain backend services using **Java** and **Spring Boot.**
- Build and support **microservices** and **event-driven** solutions.
- Work with messaging and data streaming tools such as **Kafka**, **RabbitMQ**, or similar technologies.
- Contribute to data integration, **CDC**, **ETL/ELT**, and/or **DWH**-related initiatives.
- Work with relational databases such as **PostgreSQL**, **MS SQL Server**, or similar.
- Collaborate with engineering, data, **DevOps**, and business teams.

Must-Have Requirements:

- Strong hands-on experience with **Java** and **Spring Boot.**
- Proven experience with **microservices architecture.**
- Hands-on experience with **Kafka**, **RabbitMQ**, or

similar messaging/streaming technologies.
- Experience with data streaming and/or **Data Warehouse** / **DWH** projects.
- Good knowledge of relational databases (**PostgreSQL**, **MS SQL Server**, or similar).
- Fluent in **English.**

Nice to Have:

- Previous experience in **fintech**, **banking**, or financial systems.
