Aprašymas

Main responsibilities:

- Research, evaluate, architect, and deploy new tools, frameworks, and patterns to build sustainable software solutions for our clients;
- Stay on top with the latest technologies;
- Share knowledge and know-how of software best practices inside and outside the team;
- Lead and work as part of a team, as well as independently work toward assigned goals;
- Participate in hiring processes;
- Oversee day-to-day operation;
- Set and monitor team performance;
- Discover training needs and provide coaching;
- Listen to team members' feedback and resolve any issues or conflicts;
- Recognize high performance and reward accomplishments;
- Motivate team members;
- Encourage creativity and risk-taking;
- Suggest and organize team-building activities.

Requirements:

- 5+ years of experience with modern tech stack: full-stack JavaScript/TypeScript or Java;
- Experience building backend services with NodeJS, Spring / Spring Boot;
- SQL/NoSQL database experience (PostgreSQL,

Mysql, MongoDB, Redis, ElasticSearch);

- ORM tools (e.g. EntityFramework, nHibernate, Hibernate);
- CI/CD (e.g. Jenkins, Team City, Octopus, Azure DevOps, CircleCI);
- Cloud environments (e.g. Azure, AWS, Google Cloud);
- High personal code/development standards and practices (peer testing, unit testing, code reviews);
- Experience in Agile development environment;
- Fluent communication in English.

Team Management Requirements

- Proven work experience as a team leader or supervisor;
- In-depth knowledge of performance metrics;
- Excellent communication and leadership skills;
- Organizational and time-management skills;
- Decision-making skills.
