Vilnius, Lietuva

## Apie poziciją:

### Vietovė

Vilnius, Lietuva

### Atlyginimas (Įrankas)

€2100 - 3000/Mėn.

### Trukmė

Pastovus Darbas

### Pratęsimas (projektui)

Ne

### Nuotoliniu būdu (galimybė)

Ne

### Galioja iki

2021-07-28 (Prieš 1 valandą)

Projektas nebegalioja

## Aprašymas:

You will join a newly organized team responsible for creating self-services for more than 20.000 Danske Bank employees.

We are front-end and back-end engineers who love working with the latest Angular and .NET core versions, but are also open to other technologies (React, Vue.js). We love DevOps practices and avoid manual work; hence automation is our best friend. We believe in a great user experience and high-quality UI on all devices.

Last but not least, we have the autonomy to decide what and how we deliver. We work in an Agile setup, and you will join a team of skilled front-end and back-end Software Engineers, Software Architect, UX Designer, and Business Analyst.

### Skills:

- Solid experience in designing and building software products or product features
- Solid understanding of HTTP and RESTful web APIs design
- Excellent knowledge of writing APIs with .NET Core and C#
- Hands-on experience with SQL and NoSQL databases
- Good knowledge of authentication methods

(password, token, certificate, etc.) to secure your APIs

- Experience with Unit and Integration testing
- Experience with container-based development and DevOps workflows
- Experience with message brokers and microservices-based architecture would be considered as a benefit
- Communication skills, ability to explain engineering problems and concepts in simple terms
- Fluent in English and technology

### **Mission:**

Your main quest will be to design, develop and deliver high-quality self-service applications and features for our employees. Also, you will:

- Create and maintain a development environment for efficient testing and integration
- Ensure that we have a minimal but useful technical documentation for our solutions
- Share your knowledge and experience to improve teams' way of working
- Contribute and adhere to our API coding standards, best practices, and procedures
