### Description:

Become a Senior member of our Vilnius team, working on the world's leading online password manager and digital wallet which has over 2 million customers to date. Dealing securely with passwords, registrations and payments is a breeze with our software, on every website and every device.

At Zenitech you will work in a fun English-speaking environment with people who learn and grow together every day. Collaborate with brilliant people from all around Europe, broaden your experience and contribute to products which really matter every day.

#### SWIFT DEVELOPER, IOS

We are looking for a talented, self motivated iOS developer with a strong desire to develop in Swift. You don't have to be a Swift expert, but should be following it closely and perhaps have tried it at work, or spare time. A deep understanding of Apple's core iOS frameworks is important - along with a passion for delivering beautiful and smooth user interfaces. You will be a key contributor to the design and architecture of a large Swift project, providing a cutting edge user experience. We are at the forefront of Apple technology, being consistently one of the highest-rated productivity apps in the app store. Our product has

been featured in over 100 App stores worldwide.

**With us you will:**

- Develop significant proportions of our application in Swift - re-architecting features and building new ones.
- Create cutting edge user features for the world's best iOS password manager and digital wallet
- Take responsibility for developing new features and making sure it meets iOS users' expectations
- Drive innovation and new ideas that help us improve our user experience and usability
- Participate fully as a member of the iOS team via our agile practices
- Collaborate with product team and Q&A to deliver high quality Software.

About you - You should have:

- At least 3 years of work experience in iOS application development
- You should have a strong interest in Swift and a desire to seriously pick up skills as a Swift developer
- A solid understanding of CoreData, UIKit, FoundationKit, CoreAnimation, CoreGraphics
- A portfolio containing detailed work, or a github or Stack profile showing your expertise
- A foundation in computer science, strong in data structures, algorithms and software design
- In-Depth Knowledge of Objective-C
- Good spoken English
